Install Twinr Module

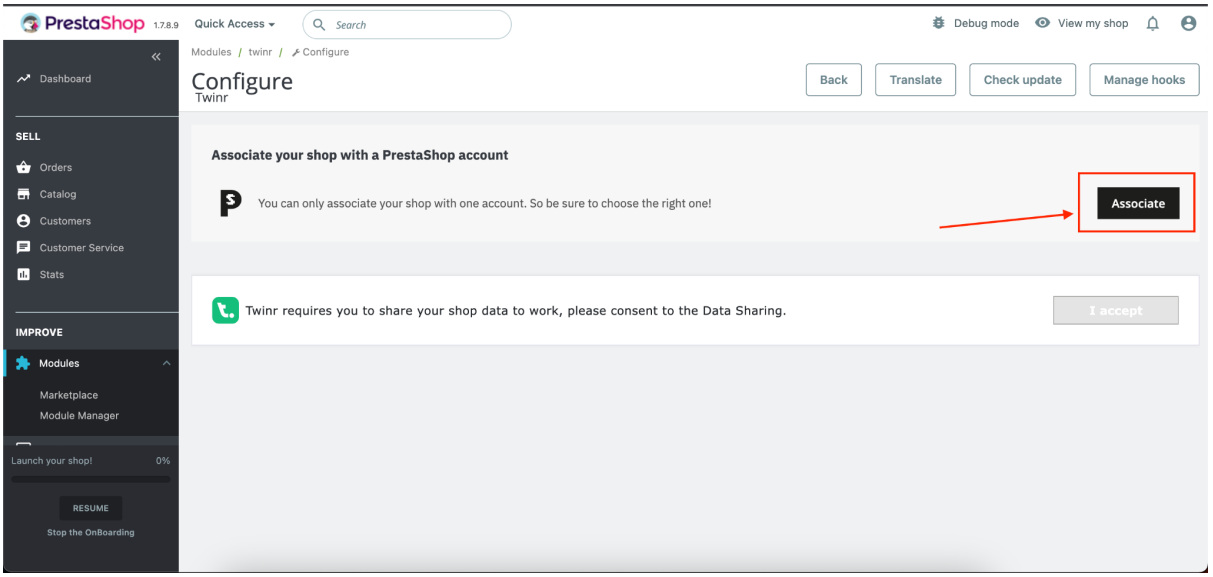

Login to your Prestashop Admin and go to Modules > Marketplace. Search Twinr and click on Install button.

Configure Twinr Module

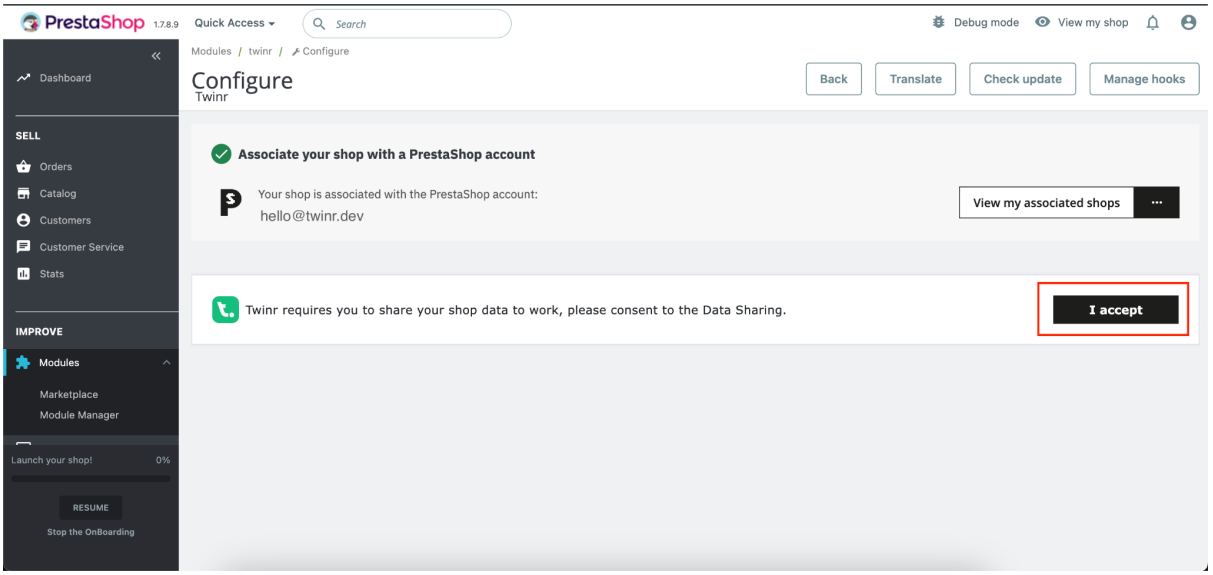

After the successful installation, click on the Configure button to associate your Prestashop store with the Twinr module.

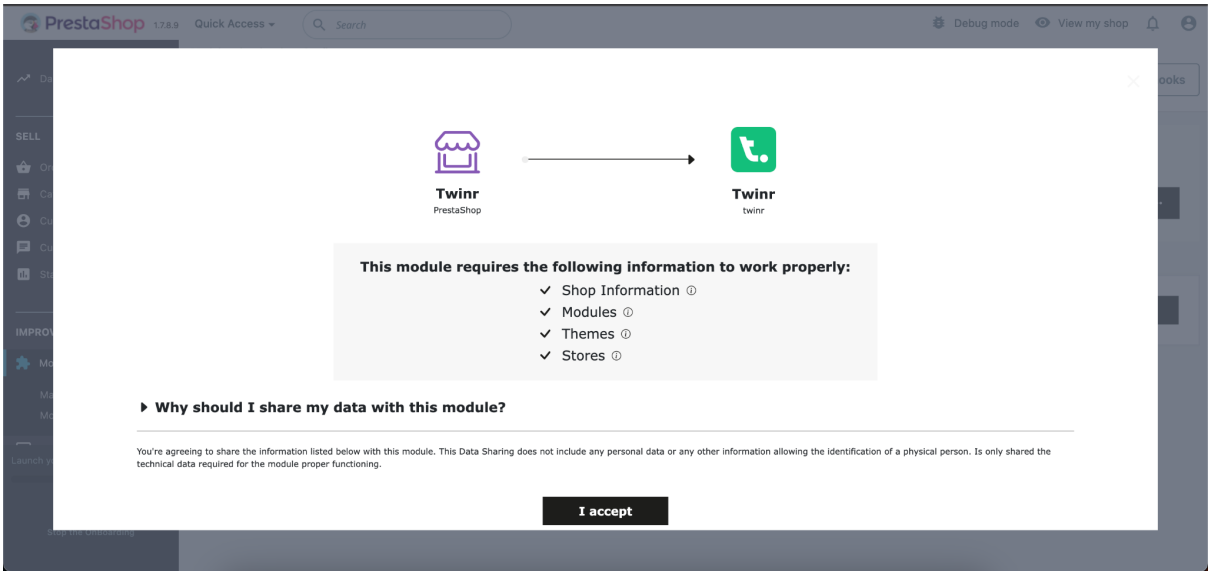

Accept Data Sharing Agreement

Once your store associated with Twinr module, you need to accept agreement to allow data sharing with Twinr module.

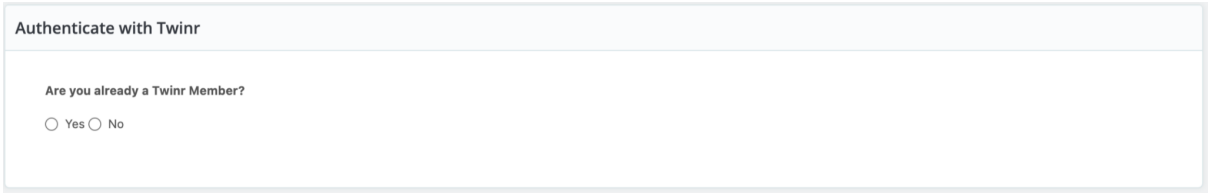

Authenticate with Twinr

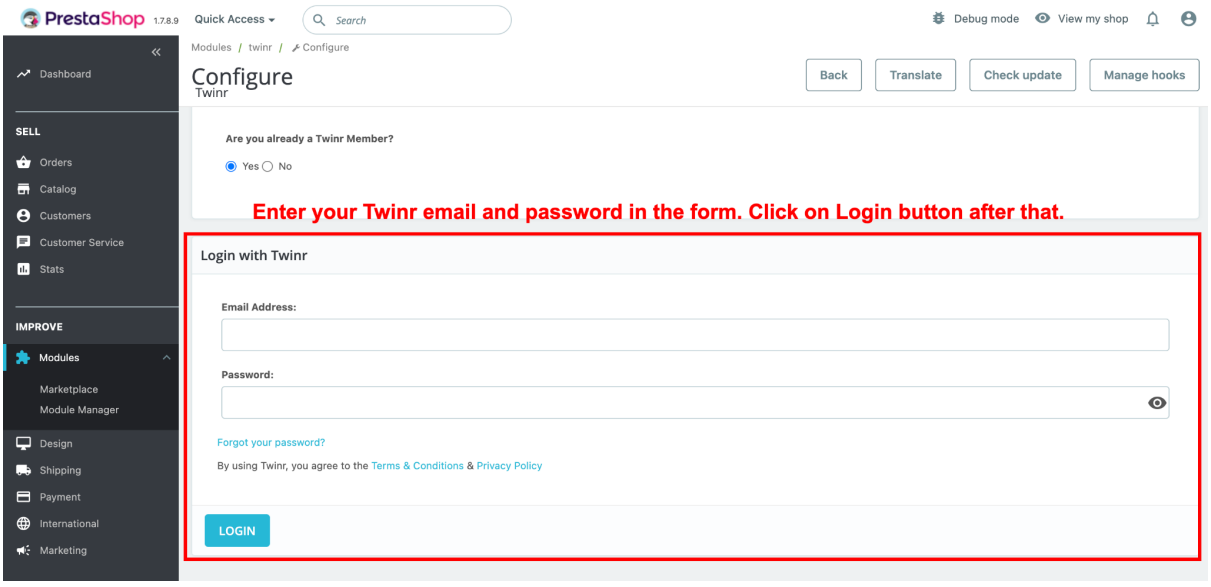

In this step, you will need to either create a new Twinr account or connect your existing Twinr account.

Select Yes if you are an existing Twinr member else select No.

Existing Twinr Member

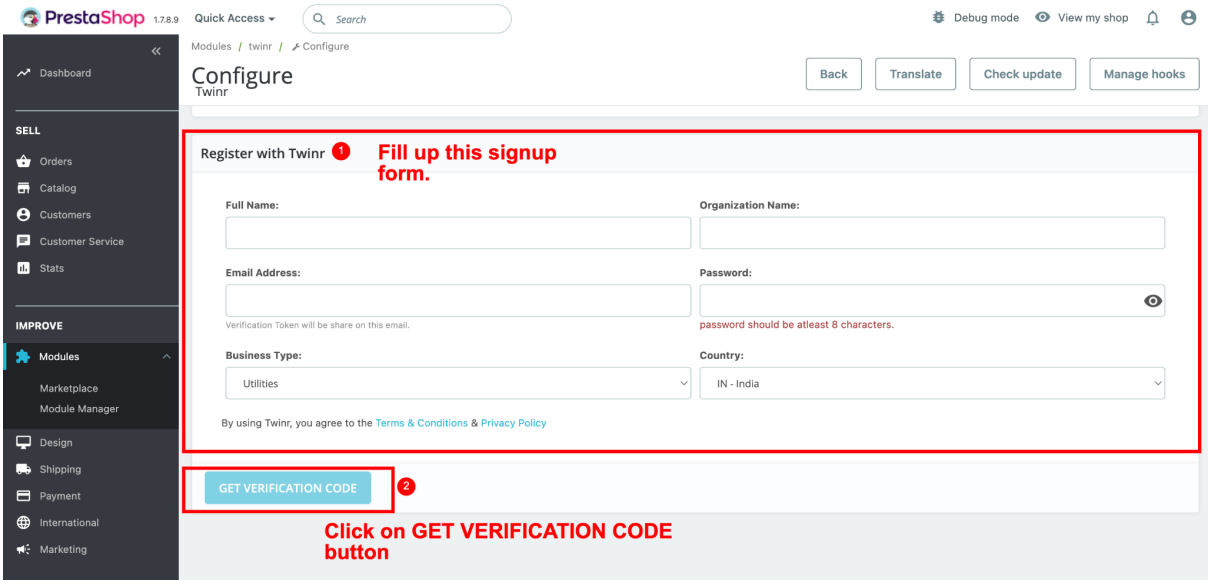

In this step, you will need to connect your existing Twinr account. You will need to enter the email and password of your Twinr account.

Create Twinr Account

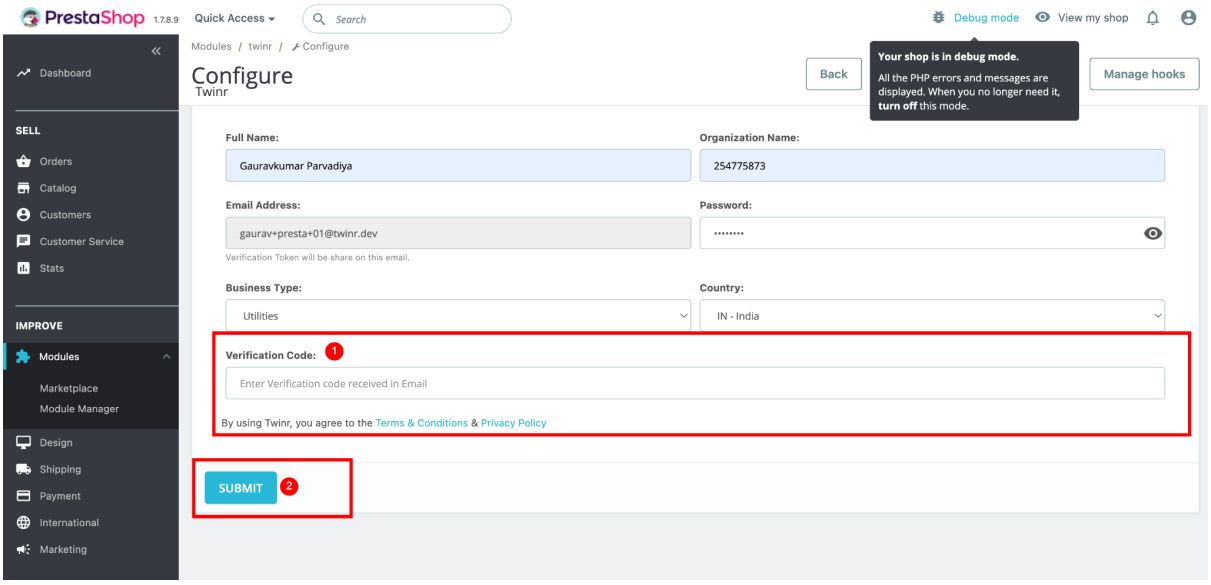

In this account you can create your new Twinr account. This account you will be using to access and edit your application on Twinr.

First of all fill-up the signup form and click on the GET VERIFICATION CODE button.

As soon as you request a verification code, a new field will appear in the signup form to enter the verification code. You must receive a verification code in your email.

Enter the verification code in the field and click the SUBMIT button to finish your signup process.

Connect or Create Twinr App

This is an automated step. You do not need to do anything here.

As soon as you authenticate with Twinr, it will automatically create a new application or connect an existing one in your Twinr account.

You can click on the OPEN APP button to open your Twinr account and start editing your application.
